Back in the saddle again. I'm writing up a monsoon of monotony for you, the ever-faithful reader, to skip over as usual. Many new things are in store for the GameShark over the next few months, none of them involving sea cucumbers though. So please, no hate mail from those militant sea cucumber factions out there, your time will come. First of all, the newest addition to the PlayStation GameShark is the CD Upgrade option. So, whenever we come up with new features, codes or hairstyles, all we need do is slap a postage sticker on the CD and send it on out. New styles of codes are coming for all other systems as well, but we won't get into that right now. After revamping all the current GameSharks, we are putting our sights on the newest addition to the family! Imagine being able to alter yours and other's DNA with the aid of a PC! We will be introducing the CloneShark for Christmas of 1999! Using a simple printer cable, some duct tape, twine, hog maws, an Ore Cookie and a lock of Scott Baio's hair, you will soon be the enhanced super-being you've always dreamed of. Infinite health, super speed and irritable bowel syndrome will no longer be confined to your video games.

Although it may appear that this section is about our GameShark T-shirt, in reality, it is a forum for those who prefer the company of

Sleestaks. This happens to be a quickly expanding subculture in America these days. The only problem is that there is a complete lack of Sleestaks to congregate with. But as they say, good things come to those who have a loose grip on reality. So, just slide into one of our comfy T-shirts, that should ease the wait for the perfect companion. Send a \$12.00 check or money order to: InterAct Accessories, Inc., ATTN: KIELBASA, 9611 Pulaski Park Drive, Suite #309, Baltimore, MD 21220. We will gladly charge all shipping fees to Chaka, he won't mind a bit.

BALTIMORE, MD - MAY 11, 1998 - Recent Quality Assurance tests indicate that some unlicensed steering controllers, including the Mad Catz Analog Steering Wheel, may not function properly with some of the newest racing titles such as GRAN TURISMO, the new PlayStation game console racing sensation.

"Unlicensed steering wheels sometimes use incompatible hardware in their products. This can cause playability problems with Gran Turismo, other game titles and even the PlayStation game console," said Jason Herskowitz, Director of Product Marketing for InterAct Accessories.

The news follows test results of a number of controllers that do not function properly with hit games such as Electronic Arts' Need for Speed II and Auto Destruct. In the latest game, release menu screens may freeze while being used with untested unlicensed game controllers.

Officially licensed products, such as InterAct's V3 RACING WHEEL (SV-1118), are full featured products that have been tested to work properly with popular race games such as Gran Turismo. To benefit consumers who may have already purchased an unlicensed racing wheel, InterAct offers the following special trade-in offer:

Consumers who return their unlicensed PlayStation game console compatible racing wheel to retail stores, and instead purchase the V3 Racing Wheel will be eligible to receive a free V3 T-shirt or cap. Proof of the transactions (including the receipt) must be sent to InterAct Accessories.

Consumers who may be unable to return their unlicensed wheel, may read us their serial number and purchase the V3 Racing Wheel at a special price of only \$49.95 (plus \$10 shipping and handling). That's \$20 off the \$69.95 retail cost. A free V3 T-shirt or cap will also be enclosed with every V3 Racing Wheel.

Both offers expire July 30th, 1998.

More details about these programs can be found on InterAct's web site at <http://www.interact-acc.com>.

This month's letters column features letters from our new Rant page on our web site, www.gameshark.com.

Dear CodeBoy,

I'd just like to say thanks very much for upgrading my GameShark with the Keycode feature, it works GREAT! I highly recommend your FREE upgrading rather than buying a new one. Thanks. Thanks and THANX AGAIN! P.S.: Publish this on your page.

Phoenix656

Phoenix,
Due to the constantly changing technology of this business, upgrades are required from time to time. As long as the GameShark continues to evolve, we will offer free upgrades. We are even developing better ways to upgrade your GameShark!

Dear CodeBoy,

I'm really scared about this new millenium thing. What the hell happens if it effects video game manufacturing? The video game world will end as we know it! I don't even think Bill Gates can help us out on this one. What about GameShark, how will it be effected by the millenium crisis? Will cheat enhancements end as we know it upon the new millenium?

Scared

Scared,
Thinking a bit too much of the future can cause some serious problems. Just think, fifteen years ago (with the attempted worldwide measurement *coup de tat* from those silly metric favorers), if you were cowering in fear over the possibility of the abolishment of standard shoe sizes as we know it. You would have suffered fifteen years of crying and thrashing all for naught. The major fear you should be focusing on for the new millenium, in one word: Dreamcast.

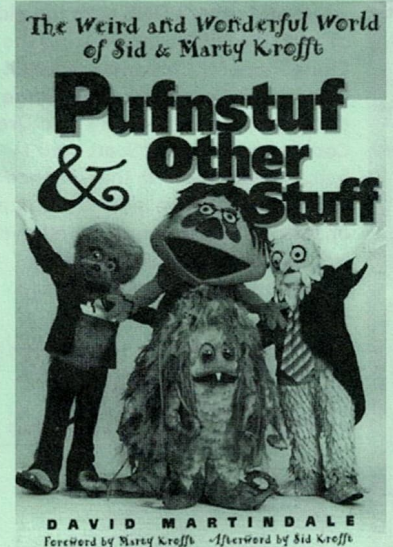

Thank you, thank you CodeBoy!

Your codes have worked wonders for me in GoldenEye, Wheel of Fortune, Jeopardy, Top Gear Rally, Hexen, Star Fox 64, Tetrisphere and Automobili Lamborghini! I have one question: Why is it so difficult to find a No-Clipping (Walk Through Walls) code for GoldenEye!? I must see the 7th tower!
Thanks CodeBoy!

Blinder

Blinder,
Thanks for all the praise. It's nice to hear every once in a while. As for the No-Clipping code, GoldenEye has proved to be a rather "interesting" hack. It takes about eight times longer than a normal game to hack, so I think I'll stay away from that game for a few months, or at least until I forget how much of a pain the game has been. The elusive 7th tower (Dam Level, behind the dam and viewable only with the sniper rifle) has yet to be tread upon as far as I know. Sounds like a job for CodeBoy.

For those who choose to use their hand-eye coordination in a much more relaxed state, check out the latest pop culture offering—Pufnstuf & Other Stuff, by David Martindale. This 'trip' down memory lane chronicles the lives and creations of Sid and Marty Krofft, possibly the most twisted duo to ever influence our nation's youth. The author, with the aid of the Brothers Weird, tells of Sid and Marty's lives before we ever heard of them. To top it all off, the book also has eight pages of childhood memories in technicolor!
